

EWS — AI QUICK START CARD (FOR CLAUDE & GEMINI)

Paste this single card into a new AI chat to start immediately without token waste.

1. Project & Environment

- **Project:** Equestrian Wasteland Sim (EWS) — 3D Touch Client
- **Owner:** Dylan Weaver (illustrator, character designer, non-programmer, voice-dictates on iPad Air)
- **Local Server:** iPad Textastic local web server running at `http://localhost:8080/EWS_with_Build.html`
- **Active Build:** `Build 11e` (Consolidated clean engine substrate)

2. The Golden Rule: NEVER Rewrite the Full HTML

- The HTML file (`EWS_with_Build.html`) is the **immutable game console**.
- Models, proportions, and poses are **portable JSON cartridges** (`ews.math/1`).
- **NEVER** generate full 250KB HTML rewrites.
- When Dylan asks for a model adjustment, pose, or color preset, **ONLY** output a compact JSON snippet enclosed in a json code block.
- Dylan taps **⚡ PASTE** in the game's `VIEWS` menu, which reads his iPad clipboard and applies your JSON live to the 3D model in under 1 second.

3. Canonical JSON Cartridge Format (`ews.math/1`)

```
```json
{
 "schema": "ews.math/1",
 "timestamp": "2026-10-07T00:00:00.000Z",
 "breed": "Mare",
 "traits": {
 "hasHorn": false,
 "hasWings": false,
 "maneVisibility": "visible",
 "hairStyle": "swept"
 },
 "nodes": {
 "head": { "pos": [0.45, 1.659, 0], "r": 0.38, "scale": [1.0, 1.0, 1.0] },
 "muzzle": { "pos": [0.72, 1.471, 0], "r": 0.18, "scale": [1.15, 0.85, 0.78] },
 "jaw": { "pos": [0.621, 1.353, 0], "r": 0.14, "scale": [1.54, 0.66, 0.95] },
 "chest": { "pos": [0.20, 0.914, 0], "r": 0.38, "scale": [0.73, 0.79, 0.73] },
 "rear": { "pos": [-0.192, 0.92, 0], "r": 0.36, "scale": [1.03, 0.93, 0.88] }
 },
 "rings": {
 "FL2>FL3": [{ "t": 0.45, "k": 1.15 }]
 },
 "paint": {
```

```
"FL4": "#332e2a",
"muzzle": "#f0c2b2"
}
}
...
```

#### ### 4. Key Engine Features in Build 11e

- \*\*⚡ PASTE\*\*:\*\* Reads clipboard and applies model JSON + paint live.
- \*\*🎨 PAINT\*\*:\*\* Whole-part presets (`4 Hooves`, `Soft Face`, `Coat reset`) + `Start Brush` surface painter.
- \*\*🔴 LOOP\*\*:\*\* Maya-style ring loop tool (blue bands for placed rings, yellow for active).
- \*\*🔵 Balls\*\*:\*\* Toggles scaffolding joint spheres ON/OFF (OFF by default for smooth, seamless cartoon limbs with zero poke-through).
- \*\*Rig Scrutiny Gate\*\*:\*\* All nodes must satisfy `tools/rig\_math\_gate.py` (canonical 26 nodes, resting organ bag 65L).
